

Level 19 Terrace

Sturt Noble Associates were commissioned by Inmark to develop a landscape plan for a 19 storey commercial and residential apartment highrise in the Sydney CBD. The development includes a retail atrium, green wall and roof top outdoor space.

The atrium is flanked to the south by a 3 storey green wall. Planter boxes will support a range of climbers trained up a wire trellis system and create a green frame to the coloured glass louvres commissioned by artist Robert Owen.

The Level 19 terrace provides a timber decking platform with custom design timber seating wrapped around the edge.

A range of succulent plants with their strong architectural forms were utilised including Dragon Trees (*Draceana draco*), Agaves, Echeveria, colourful Lampranthus, Kalanchoe and the striking Yucca elephantipes. These will cope with the hot, dry and windy conditions of this city rooftop.
