

Public open space

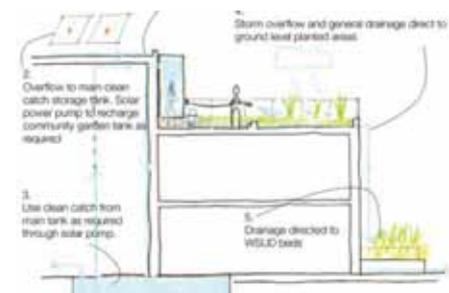

Sturt Noble Associates was engaged by Andreas Antoniadis Architects to document the public realm and landscape in a competition entry for an apartment complex within the Northbourne Avenue Precinct.

The landscape scheme incorporates a series of communal and public spaces that cater to best practice outcomes for WSUD, ESD and useable 'people friendly' spaces' providing multiple opportunities for passive recreation.

A series of three large plazas are located across the site providing pedestrian connections to roads on either side. The layout builds on site lines across the space and provides focal points such as large native trees at the end of view lines. The layout provides access to residential areas and also provides social seating and gathering areas adjacent to retail and or al fresco dining for public benefit.
