

Open lawn areas step up from paved areas

Sturt Noble Associates was engaged by Meriton to document two central open spaces landscape in this new apartment building within the Green Square Precinct.

These central courtyards form the heart of the development and a series of raised planters and lawns provides a focus for both residents to both view from their apartments above and visit at the ground level. A swimming pool and gymnasium forms a focus between the courtyards and small shelters provide private seating areas.

Large massed plantings create a highly textured plant palette to provide interest year round and include species such as Cordyline, Agaves and Phormium.

The central courtyard forms the heart of the development

Planting is bold and uses a range of accent plants
