

Sketch Concept Plan

Located at Joyton Avenue, Zetland ; Lateral Corporation are developing a high end residential project complete with large areas of both public realm and private open space.

Emerald Park buildings designed by well respected architectural practices Smith and Tzannes and Stanisic Associates emphasise sustainability, space and light.

Capturing modernism through a clever fusion of bold architecture and contrasting materials, Emerald Park creates a sense of bravado. Its dramatic facades feature green pockets, cantilevers and articulated sun shading screens.

Sturt Noble Associates have been engaged to develop the landscape design including public realm, streetscapes and a significant public open space –Mary O'Brien Park.

In addition we are developing resort style common open space areas for the residents including a roof top pool and a resort style swimming pool in addition to strong plantings throughout the extensive gardens.

Building
